

**Goldtouch Go Travel Keyboard**

The Goldtouch Go! Travel Keyboard is the ONLY compact keyboard that reduces or eliminates risk factors that lead to injury. At a mere 1 lb., it allows road warriors and mobile professionals to safely work wherever their job takes them. With keys approximately the size of those found on 14" notebooks, the keyboard can accommodate large fingers, and offers similar key feel and travel distance as found on the standard Goldtouch. Other "mini" or "compact" keyboards have shortened key travel distance which are too short or hard, and can cause significant pain from "bottoming out."

The compact design of the Go! Travel Keyboard makes better use of limited space environments, and allows for external mice to be placed even closer to the keyboard for reduced shoulder pain and increased comfort. The Go! Travel Keyboard comes with two protective covers (reduces exposure to impacts that could lead to key cap loss when traveling). To remove the covers just slide them into the lower groove of each side of the keyboard, adjust your keyboard and place your keyboard on top of your notebook key for an instant office (rubber backing prevents keyboard from slipping off notebook).

Specs & USPs 12pt Arial Bold

- Adjustability: 0°-30° adjustment for ulnar deviation (wrist splay) in the horizontal plan, combined with 0°-30° adjustment for wrist pronation (vertical tenting)
- Protective Removable Covers: Allows keyboard to be placed on the notebook
- Soft key touch, low activation force, full key travel distance provides keying comfort and reduces risk from "bottoming out" when keying.
- Compact size allows for use in limited space environments and reduces shoulder abduction when reaching for mice and other peripherals.
- Ease of use and intuitive design allow new users to adjust the keyboard to a comfortable typing position without additional accessories or attachments.
- Compatible with PC and Mac.
- Contains a USB port on the side of the keyboard to attach a low powered device such as a Goldtouch Key Pad or mouse.

Enhancements to help you achieve maximum performance & comfort from all your IT systems.
